

Why say no to GM
Cassava?

**Our solutions
are in nature**

#SayNoToGMOs

Support a farmer, Know your food

1. Support our farmers to:

- Acquire clean propagative materials for cultivation to curb the spread
- Take care of the soil health
- Practice good agronomic practices in Pests and disease controls such as crop rotation

#SayNoToGMOs

Support a farmer, Know your food

2.

Restrict movement of cuttings from disease prevalent regions in the country to curb spread.

#SayNoToGMOs

Support a farmer, Know your food

3.

Train on proper and safe handling of cassava to avoid poisoning and losses
